PROFESSIONAL SUMMARY

Senior software engineer with 8 years of shipping production systems, mostly in PHP and Laravel, including 2 years of ASP.NET and .NET Core (C#) on Microsoft SQL Server. Since 2023, has built core backend systems for a high-volume fintech platform where every transaction must be recorded exactly once, across about 1 million transaction, ledger and bonus entries a day: payment gateway integrations, wallets and fund transfers, and a double-entry transaction ledger. Earlier, led the team behind a multi-company ERP, engineered a central OAuth2 server for a multi-tenant product suite, and built, as sole developer, a telemedicine system used by three Bangladesh Navy hospitals. Now technical lead on a real estate marketplace SaaS, working across Laravel, React and Next.js.

TECHNICAL SKILLS

Backend: PHP 8, Laravel, CodeIgniter, OOP, RESTful APIs, Payment Processing, Digital Wallets, Payment Gateway Integration, Redis, Queues, Event-Driven Processing (Laravel Events), Multi-Tenant Architecture, OAuth2

.NET: C#, .NET Core, ASP.NET MVC, ASP.NET Web API, ADO.NET, Entity Framework

Databases: MySQL, Microsoft SQL Server (T-SQL, Stored Procedures, Functions, Views, Triggers), Database Transactions, Concurrency Control, Query Optimization, Execution Plans, Indexing, Paging; PostgreSQL and MongoDB (working knowledge)

Reporting: Crystal Reports, RDLC, SSRS

Architecture: Software Architecture, Clean Architecture, SOLID Principles, Design Patterns (Service, Repository)

Security: API Security, OAuth 2.0, JWT, Laravel Sanctum/Passport, Role-Based Access Control (RBAC), Encryption, KYC and Fraud Checks

Frontend: React, Next.js, JavaScript, Blade, Tailwind CSS, Bootstrap

Testing: PHPUnit (Unit and API Tests), Automated Testing, Code Review

DevOps & Cloud: Git, GitHub, Docker, Kubernetes, Jenkins CI/CD, AWS (EC2, RDS), Microsoft Azure, Ubuntu, Nginx, Apache

AI-Assisted Development: Claude Code, Codex, ChatGPT, GitHub Copilot, Cursor — code generation, refactoring, debugging, test writing, documentation and code review, with every change reviewed and tested by hand

Leadership: Team Lead, Requirements Analysis, Sprint Planning, Client Communication, Technical Interviewing

Domains: Fintech and Payments, ERP, HR and Payroll, POS, Multi-Tenant SaaS, Telemedicine

PROFESSIONAL EXPERIENCE

Softic · Dhaka, Bangladesh — *Nov 2023 – Present*

Senior Software Engineer · Full-time

- Develop core backend modules for a fintech platform serving 100,000 active users and processing around 100,000 transactions a day, plus the dependent transactions each one triggers. Case study: prothomacharjee.github.io/case-study.html
- Built wallet balances, deposits, withdrawals and fund transfers, with a balance-cap circuit breaker and one pending request per payment method.
- Designed a double-entry, append-only transaction ledger with reconciliation checks, and automated 30-second matching of pending deposits against gateway records.
- Integrated crypto and fiat payment gateways through RESTful APIs, including webhook handling with automatic retries.

- Prevented duplicate transactions and race conditions under load with state checks under row-level locks, fixed lock ordering, unique-key deduplication and Redis per-user submit locks.
- Implemented API security with JWT and Laravel Sanctum/Passport, role-based access control and encryption of sensitive data, plus KYC verification and fraud checks.
- Engineered event-driven, high-concurrency processing with Laravel events, Redis queues and caching.
- Wrote unit and API tests with PHPUnit and structured modules with SOLID principles and the Service/Repository pattern.
- Designed the affiliate and referral engine, including level-up/level-down rules and automated bonus payouts.
- Reduced a heavy financial report's load time by 70%, through query and index optimization.
- Named Employee of the Month at Softic for May 2025.

KoldaTech · Brooklyn, NY (Remote) *Jan 2026 – Present*

Senior Software Developer · Remote, flexible hours

- Lead technical development of Massara, a real estate marketplace SaaS in development: design the Laravel backend and RESTful APIs and run its infrastructure (Ubuntu on AWS EC2 with RDS, Nginx, Docker, Kubernetes, Jenkins CI/CD).
- Delivered the React and Next.js front end of Badiohub – A Legal Service Marketplace and manage its production deployment.

Glorious IT · Dhaka, Bangladesh (Remote) *Mar 2024 – Present*

Laravel Developer · Contract, project-based

- Customize and deploy a Laravel ERP, POS and HRM product for around 20 independent clients, adding client-specific features and tuning queries to each client's data volume. Also build features for its SaaS edition, which serves 100+ businesses.
- Delivered a SaaS ERP for production-based factories (Jun – Aug 2024): inventory for raw materials, work in progress and finished goods, production planning, quality control and accounting. millsoft.xyz
- Delivered a SaaS ERP for Autodynamics: multi-location stock, multi-warehouse POS, invoicing with automatic tax and recurring invoices, and customer and supplier pricing.

Magnetism Tech Ltd. · Chattogram, Bangladesh *Feb 2023 – Oct 2023*

Software Programmer (ERP Project Lead) · Full-time

- Led a team of 5–6 (developers, QA and a designer) as project lead and hands-on developer on a Laravel 10 multi-company ERP and HRM product. mhakimerp.com
- Gathered requirements on client sites and translated them into module specs and sprint tasks.
- Planned the project, designed the HR and payroll logic and database, and built the supply chain and accounting modules; used by two steel companies of Mostafa Hakim Group with around 2,500 users each.
- Set up and ran production infrastructure: Ubuntu on AWS EC2 with RDS, Nginx and Apache, Docker, Kubernetes, and CI/CD with Jenkins and GitHub.

Small Biz Marketing · United States (Remote) *Mar 2022 – Dec 2023*

PHP Web Developer · Part-time

- Delivered HistoryChip end to end for a US client, from PHP and JavaScript development to AWS server setup, deployment and performance tuning.

Genuine Technology & Research Ltd. · Chattogram, Bangladesh *Jan 2021 – Feb 2023*

Programmer (2022 – 2023) · Junior Programmer (2021) · Full-time

- Engineered a central OAuth2 authentication server for the company's multi-tenant products, which grew to 600–800 tenants.
- Developed core components of an in-house no-code platform built with .NET Core (C#), ASP.NET MVC, Entity Framework, SQL Server and Microsoft Azure: data handlers, data binders, entity builders, chart components and embedding. Case study: prothomacharjee.github.io/case-study-padma.html
- Wrote complex T-SQL on Microsoft SQL Server for HR, payroll, accounts and ERP systems: stored procedures, functions, views and triggers, with raw queries through ADO.NET.

- Tuned slow queries using execution plans, indexing and server-side paging, and maintained database health for client systems.
- Built and maintained Crystal Reports, RDLC and SSRS reports for payroll, accounts and HR.
- Extended HR, payroll, accounts and ERP systems to client requirements; trained in-house developers on the no-code platform and interviewed engineering candidates.

Chattala24 · Chattogram, Bangladesh *Sep 2020 – Nov 2020*

IT Executive · Contract

- Set up networking, the company website and online security for an IPTV and online media startup.

Navy Care (Independent) · Chattogram, Bangladesh *Feb 2020 – Aug 2020*

Independent Developer

- Designed and built, as sole developer, a web and Android telemedicine system with patient, appointment, prescription, pharmacy and lab modules during the 2020 lockdown.
- Now running on the local network of three Bangladesh Navy hospitals, open to all Navy personnel and their families. Case study: prothomacharjee.github.io/case-study-navy-care.html

Ingenuity Software Solution · Chattogram, Bangladesh *Sep 2018 – Jan 2020*

Programmer · Junior Programmer · Full-time

- Developed PHP and CodeIgniter features for POS, restaurant, pharmacy, factory management and e-commerce systems.

EDUCATION

B.Sc. in Computer Science & Engineering CGPA: 3.79 / 4.00

Premier University, Chattogram · 2014 – 2018

MBA — Human Resource Management CGPA: 3.70 / 4.00

Premier University, Chattogram · 2020 – 2022

TRAINING, CERTIFICATION & LANGUAGES

Web Application Development with .NET (C#, ASP.NET) — BITM (BASIS Institute of Technology & Management), 3-month training, 2018

Google Project Management Certificate — Coursera

Bengali — Native **English —** Professional working proficiency
